Articulated taping machine

for automatic production line

● **Mechanische Studien** ● **Realisierungen** ○ **Verkabelung** ○ **Steuerungen**

This taping machine is installed on a coil production line and **allows the application of an adhesive tape** at the end of the reel.

The pneumatic movement allows the blanket roller to be applied against the product to be taped, with **a high effort due to the toggle effect** created by the mechanism.

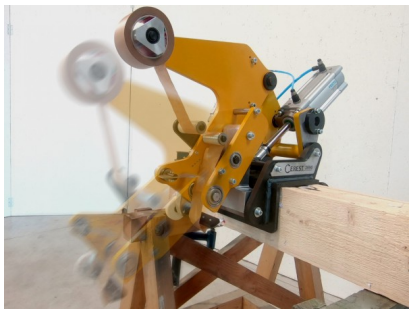

A **pneumatically driven blade** cuts the tape at the end of the operation.

The diversions roller arrangement allows a **homogeneous unwinding and makes the process more reliable**.

Roll replenishment is facilitated by the design and layout of the various elements

SPECIFICATIONS :

- **Large diameter adhesive tape (Ø270mm)**
- **For coils from Ø100 to Ø300mm**
- **3 pneumatic movements**
- **Quick clamping for adjusting the position of the sub-assembly on the support beam**

Ref : 3590
