Leakage control station

for flange mounting

● **Mechanische Studien** ● **Realisierungen** ● **Verkabelung** ○ **Steuerungen**

This station, **entirely pneumatically driven**, allows the **normative control** of a flange assembly for pressurised elements.

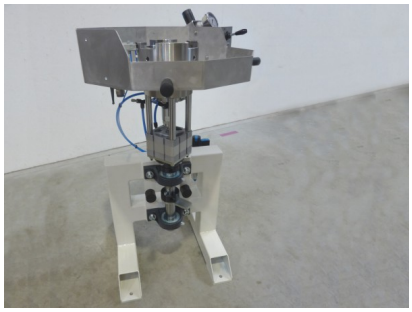

The **operator safety** is cleverly ensured by a ¼ turn flange which **keeps the part to be tested trapped in case of failure**.

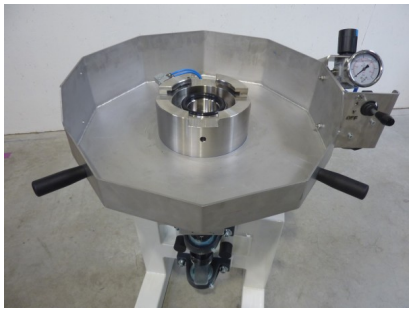

After inflation, the operator sprays the part with soapy water.

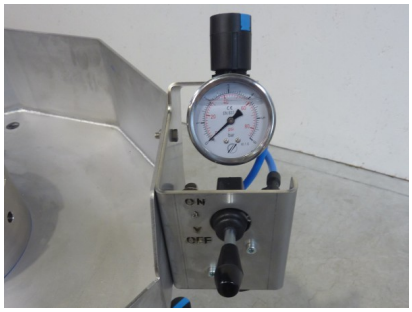

At the same time, the unclamping movement controls the purging of the chamber.

SPECIFICATIONS :

- **Pneumatic power only**
- **Adjustable pressure from 0 to 6 bar**
- **Active part in stainless steel**

Ref : 3611

Leistung hinzugefügt 27/09/21
